EDUCATION

American International University - Bangladesh — **Dhaka, Bangladesh**
Bachelor of Science in Computer Science and Engineering; GPA: 3.78 — *Dec 2021 - July 2026*

Mohammadpur Preparatory School & College — **Dhaka, Bangladesh**
Higher Secondary Certificate; GPA: 4.75 — *Feb 2018 - Jan 2020*

EXPERIENCE

6sense Technologies — **Dhaka, Bangladesh**
Backend Developer - Intern — *Nov 2025 - Mar 2026*

- Developed an employee activity-monitoring system (**JavaScript, NestJS, MongoDB**) with **REST API** endpoints for logging and retrieving activity data, following the team's existing NestJS module structure.
- Collaborated with senior developers on the company's internal tooling, contributing bug fixes and feature additions reviewed through their **PR process**.

American International University - Bangladesh — **Dhaka, Bangladesh**
Teaching Assistant — *Feb 2024 - May 2024*

- Supported students through **Data Structures & Algorithms** (C++) lab sessions covering trees, graphs, and sorting algorithms while reviewing and debugging their code to help identify logic errors and understand time/space complexity tradeoffs.

ACADEMIC PROJECTS

EduApply | [Github] (Live)
Web Application (High-Concurrency Online Admission Management System)

- Developed a high-concurrency admission platform using **ASP.NET Core (.NET 10), C#, PostgreSQL, and React,** supporting student registration, application submission, class management, and automated seat allocation.
- Implemented **JWT authentication, role-based access control (RBAC),** database transactions, pessimistic **concurrency control**, and temporary seat reservations to prevent overbooking and ensure data consistency under concurrent requests.
- Designed **RESTful APIs, layered architecture, server-side validation, centralized exception handling,** and **transactional admission** workflows for reliable and scalable backend operations.

Fitness Tracker App | [Github]
Web API (Health & Fitness Management System - backend only)

- Built a full-stack backend (**ASP.NET MVC**, 3-tier architecture: DAL–BLL–API) implementing user registration, workout/goal management, and progress-tracking end-to-end.
- Integrated token-based **authentication & authorization**, **SMTP email** notifications, and search/filter APIs.
- Used **Entity Framework**, **AutoMapper**, and SQL Server for data modeling and persistence.

Hospital Management System | [Github]
Web Based Application

- Engineered a web-based application (**PHP, JavaScript, Tailwind CSS, SQL Server Management Studio**) handling patient registration, appointment booking, doctor scheduling, and billing with conflict free scheduling logic and a **Tailwind based responsive UI**.
- Used JavaScript for dynamic DOM manipulation across forms and scheduling views.
- Consolidated registration, scheduling, and billing into a single interface to reduce manual paperwork.

SKILLS

- **Languages:** JavaScript/TypeScript, C++, Java, C#, Python, HTML/CSS
- **Database Management System:** MySQL, MongoDB, PostgreSQL
- **Frameworks:** .NET Framework, ASP.NET MVC, ExpressJS, NestJS
- **Tools & Practices:** Git/GitHub, Docker, Rest APIs, VS Code, Visual Studio 2022, Jira, Trello, Postman, Hoppscotch

NOTABLE AWARDS

- **Dean's List of Honors** - American International University – Bangladesh, 2022-2025
- **Cisco IT Essentials Certification -** (Cisco Networking Academy).
